

# 2ND ANNUAL MATH DAYS

By observing math classroom learning in action, attending GATHER, and joining family education sessions, you have an opportunity to learn a great deal about how PBS is working to challenge our math learners and ensure their continued math achievements.

## FRIDAY, OCTOBER 20

8:30 a.m. • Math GATHER Talk by Amanda Confer

9:10-10:10 a.m. • Math Family Education Session led by Amanda Confer

Amanda Confer is the director of mathematics at Camino Nueva Charter Academy in Los Angeles. This role allows her to put into practice her research from her time as education specialist and master's degree student at Stanford, where she worked closely with Professor Jo Boaler. She also has experience as a classroom teacher and instructional coach. Amanda's visit to campus last year resulted in a helpful report on our math curriculum, and she's excited to continue working with us.

## FRIDAY, OCTOBER 27

8:30 a.m. • Math GATHER Talk by Communications Manager Michael Lavigne Jr.

Michael, who majored in math and theater during his time at Wesleyan University, will present a talk about how he uses math on a daily basis, even though most people consider design work more "artsy" than "mathy."

## FRIDAY, NOVEMBER 3

8:30 a.m. • Math GATHER Talk by Cathy Williams

9:10-10:10 a.m. • Math Family Education Session led by Cathy Williams

Cathy Williams is co-founder and executive director of Youcubed at Stanford University. She became excited about what we're doing at PBS while observing our teachers during Jo Boaler's full-day workshop in August 2016. Her background includes 18 years as a math teacher and teacher-leader, as well as educational leadership at the district, state, and national levels, including legislation work.

## PARENT CLASSROOM VISITS

On Tuesday, October 3, at 7:30 a.m., you'll receive a link inviting you to sign up for visits to your child's math classes.
